Subject: Performance Certificate for Orbital tube-sheet welding equipment for
Titanium application from Polysoude S.A.S

We have purchased TS8/75 orbital welding head along with a P6 power source for
our tube to tube-sheet welding Titanium application

This equipment has been commissioned in 2015 on our site FIB Leeuwarden in The
Netherlands.

We have been using this equipment then & till today and have welded thousand of tube
sheet joints without any problems.

We are satisfied with the weld quality in accordance with the requested standards from
our end user.

With best regards,

FIB industries **FIB Industries BV**
